Bona Wire Brush System

The Wire Brush System is used with the Bona FlexiSand PowerDrive to easily wire brush timber floors. The wire brush opens up the wood grain and enhances floors by creating texture and unique colour dimensions.

Wire brushed floors can be treated with a range of Bona oil systems and finishes to create floor effects with contrast and depth. The possibilities are endless.

How it Works

Bona's Brush Technology uses wire brush attachments to remove the soft wood between the grain, adding depth and texture to the wood's surface.

This allows the coloured oil or stain to settle between the grain, creating effects which enhance the natural pattern of the wood.

1. Flat surface

2. Brushed surface

3. Finished effect

- Easily attaches to FlexiSand PowerDrive
- Durable, easy-to-use wire brushes for use with both newly installed and existing floors
- Allows for close proximity to walls for minimized edge work and blending issues
- Provides a natural texture and look to the floor
- Creates a unique dimensional effect

The wire brush system includes all parts and accessories required:

- Wire Brushes
- PowerDrive Dust Skirt
- Dust Shroud and Drive Pad for Dewalt Hand Held Sander
- Protective Gloves
- Wire Brush Corner & Removal Hand Tools
